I texted Jim and asked that he send a written request for assistance to Scott. He did not reply yet.

Ed and Josh,

I just spoke with Ken and Dave.

I understand Dave has been in contact with Jim Macy who has requested our assistance on the scene. I am not clear on why the facility is not able to respond adequately. We will send an OSC tomorrow morning.

I don't have much detail. It is reported that the pesticide laced grain waste from the ethanol process was being land applied at some rate. Now the storage vessel has a leak that may be uncontrolled.

We do not know if it is reaching a waterway.
